

Teradata AI Unlimited via AWS Marketplace

Discover AI innovations without boundaries

Get the freedom to innovate with Teradata AI Unlimited. Explore and discover AI innovations and use cases without boundaries with the flexibility of a serverless AI/ML engine in the cloud.

Now in private preview on Amazon Web Services (AWS) Marketplace, Teradata AI Unlimited enables data scientists, data engineers, and developers to seamlessly explore data, conduct experiments, and operationalize AI use cases without risk or restraint to mission-critical production environments.

Teradata AI Unlimited brings the power of Teradata's industry-leading ClearScape Analytics™ capabilities to AWS, delivering an enterprise-grade AI service that maximizes exploration and discovery in a low-cost environment. It offers unlimited flexibility and scale to make AI innovation faster, easier, and more cost-effective with high-performance compute, powerful in-engine analytics, and native integrations with the AWS ecosystem. Get started in minutes and analyze data where it lives in AWS. And eliminate the fear of cost overruns with on-demand compute and pay-as-you-go pricing.

AI Unlimited via AWS Marketplace

Teradata AI Unlimited on AWS offers robust capabilities to power new AI use cases. It delivers massive parallel processing, the ability to build and run models, and operationalization at scale. By running AI Unlimited via the AWS Marketplace, users can simply deploy the environment in their cloud infrastructure and start using it in minutes by accessing all shared storage in AWS. Data can also be accessed via open data formats (Parquet, CSV, and JSON) using Jupyter Notebook, Microsoft Visual Studio Code, or Microsoft Excel. Bring Your Own Model (BYOM) capabilities also enable users to operationalize any model trained by AWS SageMaker as well as other partner tools, such as dataiku, H2O, and DataRobot.

Innovate faster through seamless integrations

Deliver AI innovations faster with secure, flawless integrations that let you focus on exploring data, not managing data infrastructure. Access all shared storage in AWS, eliminating expensive data movement and time-consuming data infrastructure management and saving time, cost, and complexity. You can smoothly transfer and operationalize prototypes in a Teradata VantageCloud production environment at any time. This gives you the freedom to experiment without impacting mission-critical production environments.

Teradata AI Unlimited on AWS offers robust capabilities to power new AI use cases.

Efficiently control costs and drive value

Make your budget count with compute resources you can control. Purchase Teradata AI Unlimited through a self-service, on-demand experience via AWS Marketplace, with native integration into the AWS SageMaker ecosystem. Then pay only for the actual time you spend exploring and problem-solving.

Please visit our [AWS partner page](#) to learn more.

Open integration with the right capabilities

Teradata AI Unlimited continues the Teradata commitment to fostering an open and connected ecosystem so users can access the right capabilities for each step in the AI and data analytics journey.

Teradata enables you to use the capabilities of your choice, including:

- Access to any data lake that supports open table formats (OTFs), such as Apache Iceberg and Delta Lake
- Compatibility with open file formats, such as Parquet and CSV, with access from Jupyter Notebook, Microsoft Visual Studio Code, or Microsoft Excel
- Native integration with Python to call analytics functions, execute Python code, and import Python models directly into Teradata AI Unlimited
- Bring Your Own Model capabilities to easily enable users to operationalize any model trained by AWS SageMaker with other partner tools such as dataiku, H2O, and DataRobot
- Ability to smoothly transition and operationalize a prototype into a VantageCloud production environment

About Teradata

At Teradata, we believe that people thrive when empowered with better information. We offer the most complete cloud analytics and data platform for AI. By delivering harmonized data and trusted AI/ML, we enable more confident decision-making, unlock faster innovation, and drive the impactful business results organizations need most.
